Node JS: Weekend Assignment

Node JS – Bank API with Mongoose + React

The following exercise contains the following subjects:
- express
- Postman
- React

Submitting instructions:
- Push the full folder hierarchy of the project to your own repository on Github.

Instructions:
- Convert your previous weekend assignment "bank API" to Mongoose.
- Use [MongoAtlas](#) to handle your database.
- Connect your express server with a React app.
- Test your server endpoints in React.

First, connect your database to Mongo Atlas. Then test your end points with Postman on the server side. When everything
